Advanced dismantling in hall 4.1 and hall 5.0/5.1 (New Mobility World)

The advanced dismantling for hall 4.1 and hall 5.0/5.1 takes place during the current exhibition and is therefore subject to special logistical requirements described below. Please consider these requirements for your further planning.

General requirements for the advanced dismantling in both halls

1. The basic traffic rules according to the IAA Information Sheet for [Traffic Management](#) are valid.
2. All employees involved in the advanced dismantling require access authorization (exhibitor pass or dismantling pass, available in the Shop for Exhibitor Services).
3. All employees, who have worked for less than a year in a company involved with the dismantling are required to undergo a reliability check by the security authorities similar to the setup.
4. During the exhibition opening times, driving on the exhibition grounds is only permitted to a limited extent. There is a driving ban in the so-called red zone between the halls.
5. Vehicles which have to enter the exhibition grounds for loading and unloading for the dismantling need to be registered via CeTraM (Link: <https://einfahrt.messefrankfurt.com>).
6. Parking passes for the exhibitor parking areas (P4/P9) can still be used for car parking.

Signs and Symbols:

- X Entry to the hall via this gate is possible for the entire gate opening times
- No entrance to the hall is possible via this gate

Due to increased safety requirements, delays may occur for the entrance of vehicles. Each passenger of the vehicle is required to carry an access authorization (see point 2). On Sept. 14, 2019 traffic jams and delays may occur in the traffic environment around the IAA grounds. In addition, further short-term measures are possible.
